

MINGYUN GUAN

Seattle, WA · guangoku@gmail.com · mingsplayground.com · linkedin.com/in/mingyun-guan-founder-data

Data Platform & ML Engineer · Founder, Atolla Ocean · Ex-Amazon

End-to-end systems builder with 10+ years spanning data infrastructure, ML engineering, and analytics. Deep experience leading zero-to-one projects from architecture through production, mentoring engineers, and bridging product, data science, and engineering teams. Currently building Atolla Ocean as a founder; known for owning outcomes, not just pipelines.

EXPERIENCE

Founder · Atolla Ocean · Self-employed Nov 2025 – Present · Seattle & China

- Building an AI platform that helps recreational divers identify marine life and turn raw dive footage into structured, educational stories.
- Defining product direction, user experience, and validation strategy from zero; running user interviews and discovery as part of the Founder Institute 2025 cohort.
- Exploring computer vision and ML approaches for species identification using real diver media; prototyping early MVP concepts end to end.

Senior Data Engineer (Tech Lead) · Amazon Jan 2019 – Dec 2024 · 6 yrs · Seattle, WA

Progressed DE II → DE III; IC Tech Lead across Strategic Business Trends and Customer Service ML.

- Led a 6-engineer team delivering a **zero-to-one** internal web product with ML backends — prototype in ~3 months, public beta in ~11 months.
- Architected full data/ML stack: multi-source ingestion → knowledge graph → trend detection → APIs and OpenSearch-based ranking.
- Built and deployed 5 batch ML models with near-real-time ranking via SageMaker and CI/CD.
- Integrated 5+ external data providers into an S3 + Glue + Snowflake + Redshift + Athena lakehouse; designed schemas, metadata layers, and data-quality monitoring.
- Designed NLP pipelines for contact classification with inter-day latency; built defect-detection workflows using AutoGluon and deep learning.
- Led org-level privacy/security reviews, hiring loops, onboarding, and AWS cost efficiency.

Business Intelligence Engineer · Amazon Kids+ Oct 2017 – Dec 2018 · Seattle, WA

- Designed scalable Redshift data models and analytical foundations for product, marketing, and finance.
- Built self-serve dashboards enabling non-technical teams to explore data independently; delivered analyses shaping pricing strategy and UX decisions.

Senior Data Analyst · Universal McCann Worldwide Feb 2015 – Sep 2017 · New York, NY

- Promoted from Data Analyst after first year to lead analytics automation efforts
 - Built marketing-mix and Bayesian models to measure media impact and optimize budgets.
 - Designed self-serve ETL and data-quality tools — 90% faster workflows, ~80% fewer errors.
-

INDEPENDENT & VOLUNTEER

Sole Engineer & AI Advisor · CharityBox (益盒) · Volunteer Jan 2025 – Present · Remote

- **Only technical contributor** for a WeChat-based platform making 1% income giving simple and transparent across China — owning full-stack development end to end.
 - Leading the organization's AI transformation: building internal tools and providing strategic guidance on AI adoption.
 - Building an automated operational data pipeline integrating multiple sources via Feishu to support reporting and program management.
-

SKILLS

Data / ML: Pipelines & orchestration, data modeling, MLOps (SageMaker, CI/CD), knowledge graphs, API design

Platforms: AWS (Redshift, Athena, S3, Glue, Lambda, Step Functions, SageMaker, OpenSearch, CDK), Snowflake, Spark — deep experience in AWS-native data warehousing (Redshift, Athena) as counterparts to BigQuery

Languages: Python, SQL, TypeScript, JavaScript, Git

Analytics: Tableau, metrics & experimentation, A/B testing, data visualization

Leadership: IC tech lead, cross-functional communication, mentoring, security & privacy reviews

EDUCATION

MA in Statistics · **Columbia University** 2015 · New York, NY

BA in Economics – Statistics (Minor: Mathematics) · **Xiamen University** 2013 · Xiamen, China
